

# We Can Reduce Your Set-Up Time

When it comes to productivity,  
**SECONDS MATTER.**

REDUCE set up time. MINIMIZE part change time. INCREASE cut time. All with Chick Workholding.

## OneLOK

Our re-engineered OneLOK is designed for vertical milling machines running fewer than 20 parts.

- Setup quicker** using our BoltFast™ jaw system
- Operate easier** with a lighter design and handgrip
- Work cleaner** thanks to a sealed design
- Clamp faster** with the QwikSlide movable jaw

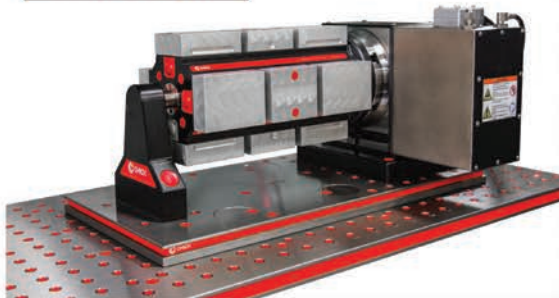

## QwikLOK

Divide & conquer in today's competitive market with the QwikLOK. Designed for repeat batches of 20 to 1,000.

- Setup quicker** with built-in locating features
- Double down** by holding two parts at a time
- Walk away longer** thanks to fewer machine stops
- Maximize your versatility** with endless fixturing options

## Indexer Subsystem

Crank up the performance of your vertical CNC machine.

- Decrease part change time** by holding two work pieces per side
- Reduce tool change time** drastically since tools are used longer
- Gain precision** and achieve critical tolerances
- Walk away longer** by multiplying the number of parts under the spindle

## MultiLOK

There's strength in numbers when it comes to our MultiLOK.

- Change fixtures** easily with a simple turn of a handle
- Gain precision** with a lighter design and handgrip
- Operate with ease** thanks to a sealed design
- Maximize your versatility** with endless fixturing options
